

FROM INSPIRATION TO IMPLEMENTATION

We optimise your plant performance, increase economic viability and production and reduce construction and development costs.

Our services

- › Project support from planning to commissioning
- › Solution-oriented plant engineering, all in one place
- › Automation, switchgear construction and component construction
- › Extensive services such as maintenance, optimisation and spare parts service

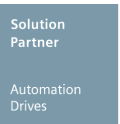

Our individual plants are primarily used in

-  Pharmaceuticals and food technology
-  Energy and heating technology
-  Industrial automation

We offer you inter-sector benefits

- ✓ Our solid accumulated broad application knowledge
- ✓ Solutions all in one place
- ✓ Quality through defined processes
- ✓ Own testing facility
 - › For intensive testing beyond the standard specifications (e.g. via programmable testing processes)
 - › For quality assurance
 - › To save costs and time
- ✓ Reliable commissioning

INDUSTRIAL AUTOMATION

SUATEC – OUR PHILOSOPHY

We plan, project manage and automate your plant with the claim of the best quality and the highest precision. Your satisfaction is our priority and our motivation. Thanks to our experienced and highly qualified employees, we know what needs to be done and provide you with individual solutions.

Planning

Implementation

Automation

INDUSTRIAL AUTOMATION

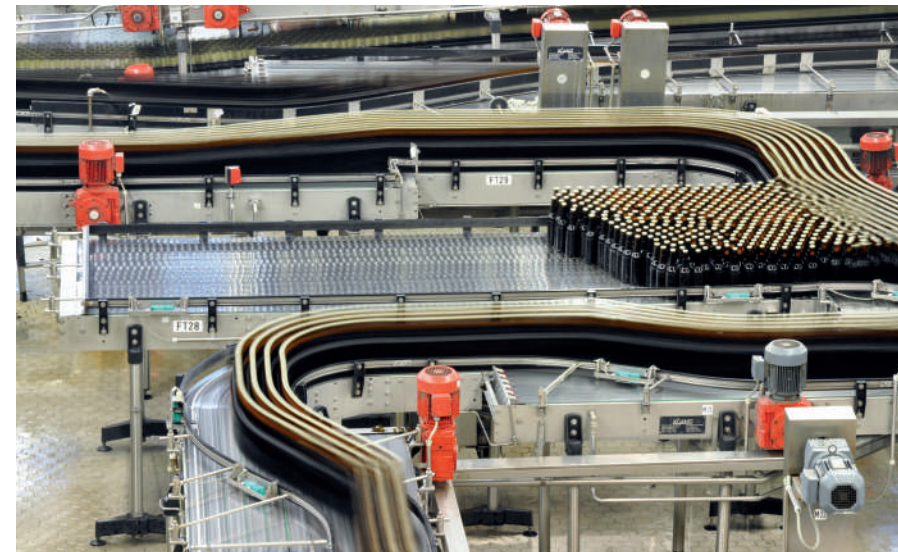

Automation in all technical areas is our core competence. Where energy is required, we can design sequences to be sustainable and efficient and offer intelligent solutions. Whether in energy distribution in medium or low voltage switchgears or in energy generation. Our knowledge is inter-sector. We understand your processes and implement your requirements in automation. We do this in a variety of areas, on a variety of scales.

For example in:

- › Transport systems
- › Production plants
- › Processing procedures
- › Energy generation plants

But we can do even more than that. Challenge us.

Our control technology, plant automation, state-of-the-art process control engineering and commissioning stands for a high level of safety. We can offer the whole range, but also provide support in sub-areas such as planning, construction, programming and service.

Our specific services

-  Consultation and quote creation
-  Electrical design
-  ePlan Electric P8, ePlan ProPanel
-  Control cabinet construction
-  Programming and automation
-  Creation of operating, visualisation and control systems with data archiving

As a solution partner of Siemens, we operate inter-sector. Worldwide. We have a great deal of flexibility. Therefore, we can adjust to all other common programming systems. According to the requirements of our customers. These include:

- › Public utilities
- › Automotive industry
- › Food and luxury item industry
- › Chemical industry
- › Paper industry
- › Maritime technology

We see ourselves as a complete service provider. From the start of planning to commissioning and training the operating personnel.
