

Maintenance + Service

www.suatec.com

Our Service – Your Benefit

From general and project planning to commissioning – we want your system to run reliably. Optimised and effectively.

Energy and raw materials are more valuable than ever. That's why sustainable thought and action are the basis of our company philosophy. We want to ensure the optimal production and efficiency of your systems. Now and for the future. This is our mission.

That's why we offer comprehensive service beyond the warranty period.

OUR SERVICES FOCUS ON:

Maintenance and preventive maintenance:

- We develop individual maintenance agreements – customised for your needs. From our regular maintenance service you know that minimal discrepancies are identified and remedied. This prevent downtimes and increases the life of your systems.

Optimisation of existing systems:

- Our qualified staff are constantly trained and are at the cutting edge of technology. We find out where process optimisation of your system is possible. This increases your production and your profits.

Economic efficiency calculation:

- Thanks to many years of experience, we know what systems can do. We calculate the economic efficiency of your system. And have proposals for solutions if you want to better utilise your capacities

Increase in energy efficiency:

- To lower costs and to protect the environment, we can optimally tap the energy efficiency potential of existing systems. This increases the economic efficiency of your system.

Remote maintenance and remote control technology:

- Even when we are not on site we can monitor your systems and even remedy errors – by performing fault analysis via telephone or over the internet. You can count on the reliability of your systems.

Thermography for fault detection in contacts and terminals:

- Using our special thermal imaging camera, we uncover the smallest flaws and remedy them – before things come to a standstill.

Spare parts management:

- Our service saves you from having to maintain an extensive spare parts inventory. Just give us a call and we'll promptly deliver the components you need. And we can install them right off if need be. This save you both storage space and costs.

Process optimisation:

- System change their properties. Even the replacement of components can change the performance capacity. We adapt programming to the components installed. And in this way, we re-establish reliable performance capacity and optimise it for the best case.

The SUATEC service check sticker

- We have developed our own service check and inspection sticker. Every control cabinet and every system we maintain has one. So you can always see when the next maintenance or next servicing is scheduled.

Holiday service:

- Our special service: We'll send you a specialist when one of your employees is absent. Whether for illness or holiday, so you can be certain that your operations will continue to run. You save staffing costs and can plan to deadlines.

THE BENEFITS OF OUR EXTENSIVE SERVICES:

- **Downtimes are avoided**
- **Costs are reduced**
- **Energy is optimally used**
- **The performance capacity of the systems is optimised**

SUATEC – with us at your side you can reliably calculate the future.
